

PrecastStairs

Precast Bespoke Concrete Staircases

Why Choose Turley Bros for Concrete Staircases?

We've been providing concrete solutions to construction sites within the commercial and residential sectors for over 60 years. As well as massive expansion in our product range, we ensure that all our products are of excellent quality with the CE mark, adhering to British and European standards.

If you have any questions about our products or how our precast concrete staircases can help your next building project, or if you would like a quotation, please call or email us directly. We will be more than happy to answer any questions you may have.

Our full product range is available as downloadable brochures from our website.

PRECAST

IN SITU

Precast stairs form a solid, durable base for a more creative finish, such as stone, timber, tiles or carpet, giving a modern feel to any building.

PrecastStairs

Precast Bespoke Concrete Staircases

Solid, Safe, Stylish Staircases

- High Level of Safety
- Inherent Fire Resistance
- Cost-effective
- Resilient and Durable

Turley Bros Precast Concrete Stairs are safe, durable and cost-effective and are ideal for:

- **Residential Homes and Apartments**
- **Retail and Commercial Offices**
- **Sports Stadia**
- **Civic and Public Sector Buildings**

Expertise in Precast products

Turley Bros are experts at all things concrete and are one of the Ireland's leading manufacturers of high quality precast concrete products. We specialise in precast concrete stairs, from simple staircases and landings to complex bespoke installations including spiral and helical stairs. We have provided precast concrete solutions for a range of private and public clients throughout Ireland and the UK, ranging from residential and commercial construction projects including home builds, offices, retail, hospitals, schools and civic buildings.

Design for bespoke solutions

Staircases are often a tricky and challenging element in building and construction. Our highly experienced design team believe in liaising and working closely with the client and have a leading role in producing project-specific solutions to the most complex bespoke staircases.

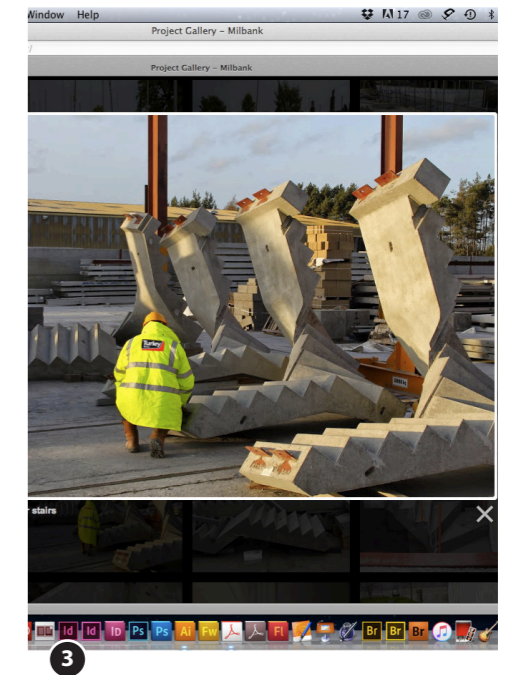

Safe and cost-effective.

Precast staircases add a whole new level of safety to your building. They possess inherent fire resistance qualities and adhere to progressive collapse requirements. Furthermore, as well as offering an excellent level of noise and sound insulation, precast concrete stairs are incredibly cost-effective. And they look good too, forming a solid, durable base for a more creative finish, such as stone, timber or tiles, giving a modern feel to any building.

PrecastStairs are CE certified and manufactured to British and European quality standards and:

- **have a recognised high level of safety**
- **have inherent fire resistant qualities**
- **are resilient, solid and durable**
- **are cost effective**
