L-Walls

Moveable, retaining concrete L-sections

Moveable, concrete retaining "L" walls have a wide range of uses, whether they are civil engineering projects or farm and factory storage. "L"-walls not only make an easy, cost-effective and attractive alternative to standard fixed walls, but with their diverse and flexible uses, they also help to protect our environment. "L" walls are steel reinforced making them strong and robust.

Stand alone "L" walls are ideal for several situations, including:

- Civil engineering projects
- Housing developments
- Retail Parks
- Retention of soil banks
- Silage, compost and storage of agricultural products
- Storage of building materials
- Storage of recyclables and waste redistribution
- Extreme contour driveways and gardens

L-Wall Design conforms to BS8110
